About SAFLOK™

KABA is a globally active, publicly traded security corporation. With its "Total Access" strategy, KABA specializes in integrated solutions for security, organization, and convenience at building and information access points. KABA is also the world market's number-one provider of key blanks, key cutting and coding machines, transponder keys, and high-security locks. It is a leading provider of electronic access systems, locks, master key systems, hotel locking systems, security doors, and automatic doors.

Saflok joined KABA in 2006. Saflok is a market innovator with 30 years of experience designing, manufacturing, and distributing electronic locks and systems. Its solutions are installed globally in the hospitality, lodging, multi-housing, and commercial markets. Saflok is committed to delivering best in class solutions that help properties achieve improved operations and reduced costs.

Using the latest technology, our experienced team of designers and engineers is able to translate those needs into customized applications that will add value to your company.

SAFLOK understands the critical needs of our diverse customer base because we listen and work together to solve their needs. From initial sales to after-market support, SAFLOK’s experience, stability, and depth of resources enable us to provide solutions that will help you achieve greater security, efficiency, and flexibility in your daily operations, thus adding to your bottom line.

For nearly 30 years, property managers around the world have relied on SAFLOK to provide security solutions to meet the ever-changing needs of the industry. SAFLOK is your partner for all your electronic lock and access control solutions.

About INNCOM® by Honeywell

INNCOM develops advanced, software-based, Energy Management, Integrated Room Automation and Common Area Control Systems for the global lodging, healthcare, and educational housing markets.

INNCOM’s world-class R&D and Engineering teams work hard to bring you a broad range of innovative, intelligent devices and dependable, integrated systems. These are combined in various ways to provide fully integrated applications for temperature and humidity control, energy management, lighting control, drape control, on-line electronic lock control, guest (end-user) interfaces and operating enhancements for housekeeping, security, operations and management staff.

Linking all guestrooms with INNCOM’s INNcontrol™ 3 Central Monitoring and Control Software System provides the most powerful energy management system available on the market today. A few of the advanced capabilities include:

- Tracking guest service requests
- Remote room occupancy indication
- Remote HVAC control
- Guestroom HVAC diagnostics
- Peak demand load shedding
- PMS/BMS interface
- Automatic lighting control

Our systems are installed in more than 800,000 rooms worldwide and our clients range from the most prestigious 5-star hotels to specialty limited-service properties. Among many others, we are proud to serve the needs of: Carlson, Fairmont-Raffles, Four Seasons, Gaylord, Hard Rock, Hilton, Hyatt, InterContinental, Jumeirah, Kimpton, La Quinta, Mandarin Oriental, Marriott, Oberoi, Radisson, Starwood and many independent properties.
The Power of the Network

When your hotel is equipped with an INNCOM Integrated Room Automation System (IRAS) network, it has the infrastructure to provide a higher level of service to your guests as well as the information to enable it to run more efficiently. This network can not only monitor HVAC equipment performance, temperature settings and room occupancy but it can also connect other room systems to their respective server applications.

When your hotel chooses Saflok™, the locks can be equipped with a communication module that allows them to communicate to a central server via the INNCOM network. It’s the power of having multiple vendors and multiple room systems share the benefit of one common back-bone network.

The Many Benefits of Central Electronic Lock Systems

- Rooms can be remotely re-assigned.
- Suites can be reconfigured from the front desk.
- Guest’s check-out time can be extended remotely.
- VIP’s can be checked-in without stopping at reception.
- Instant notification of a door being forced open.
- Lock functionality verification before a card is issued to a guest.
- Universal cancellation and/or re-issuance of a staff key card without having to go to each lock in the property.
- Daily lock-time synchronization.
- Automatic daylight-savings changes.
- Reduced costs of labor, batteries and dead lock events with battery condition reporting.
