

Transform Data into Savings

INNCOM ASX Reports from Honeywell

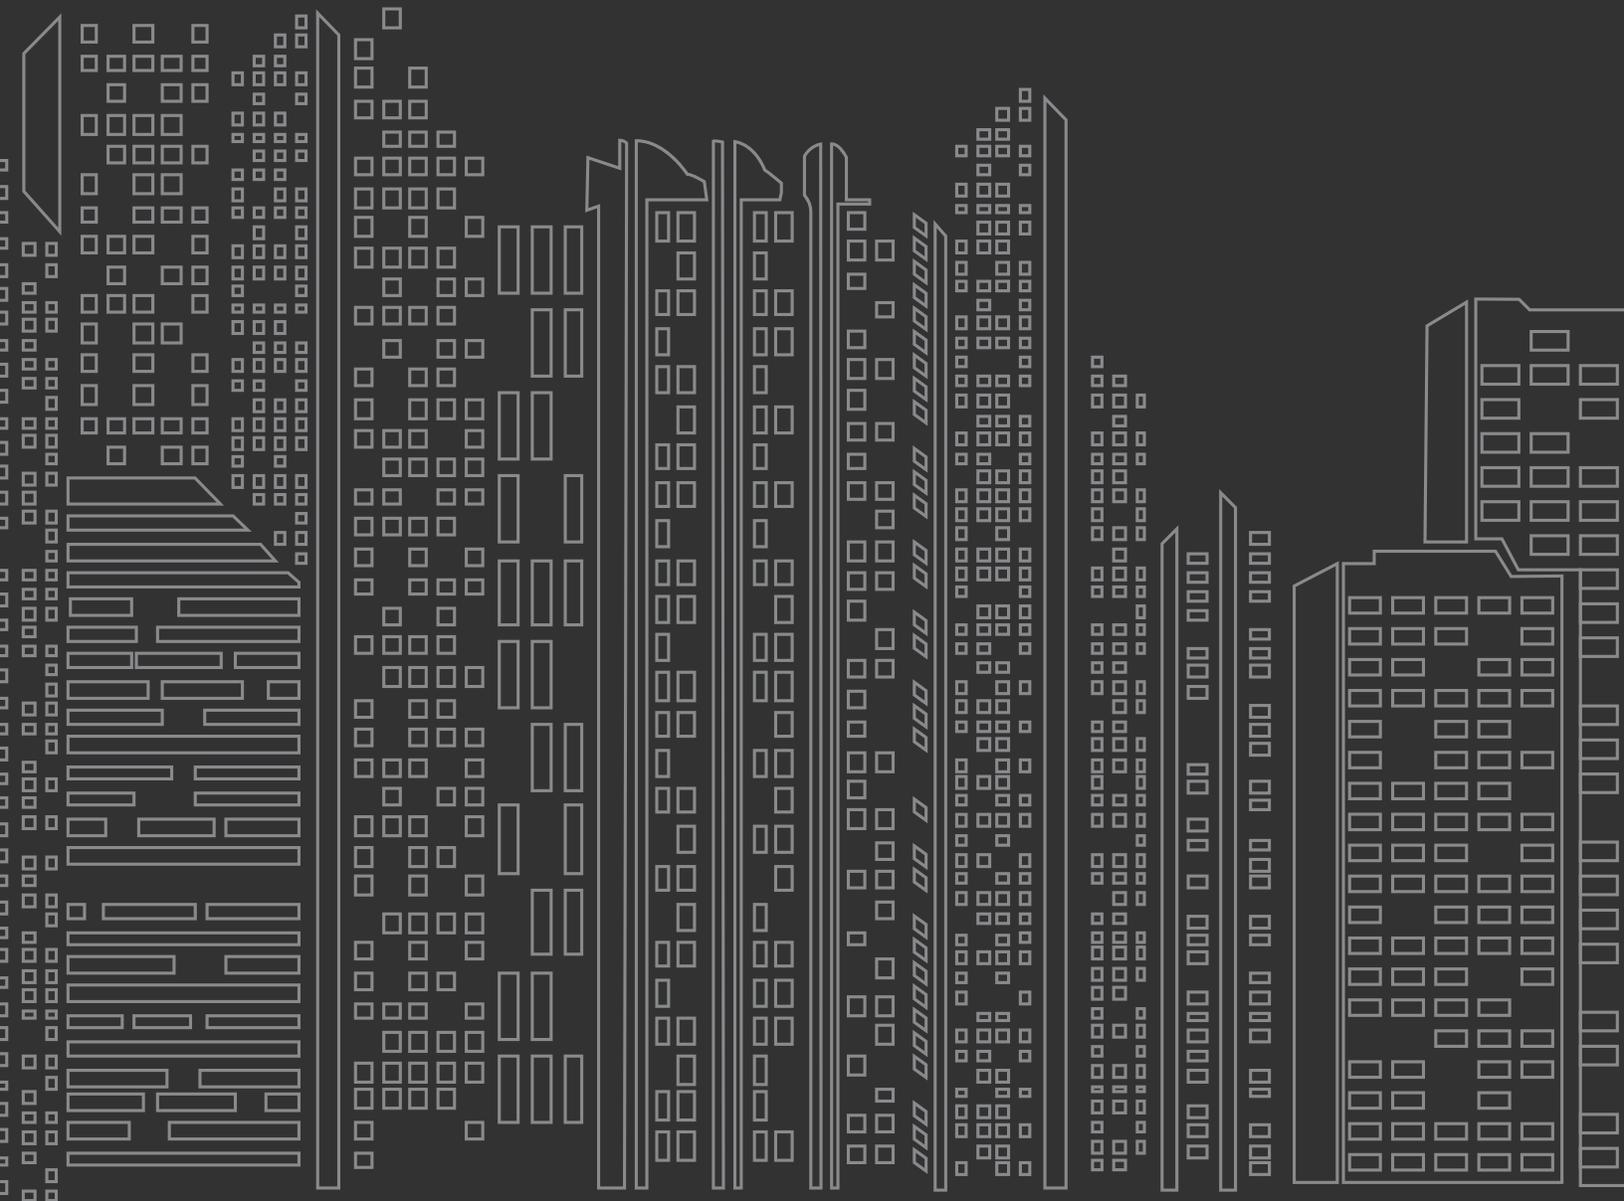

With INNControl3, you've got the data.

Now put it to work with an ASX Report from Honeywell.

Your facility has the connected capabilities of the INNCOM INNControl3 platform.

The next step: Make sure you get maximum value from your infrastructure.

With an ASX Report, it's easy. You'll get the insights you need for effective planning and to prioritize your maintenance efforts for optimal impact.

Optimize Your Operations

The Analytics Services Exchange or ASX Report uses data from your INNControl3 system to create a detailed analysis of how effectively your in-room automation is performing.

You'll get insights into the health of systems and devices, breakdowns of energy costs and savings, and specific actions you can take to improve performance.

Track Results Room by Room

You'll also get data for the rooms on your network with analysis of how well guests sleep, factors that may reduce comfort (and ways to fix them), how guests use devices in their room, and more.

Build Relationships with Proactive Service

With detailed insights into what guests are experiencing and what they need, you'll be able to further improve the quality and responsiveness of your operations.

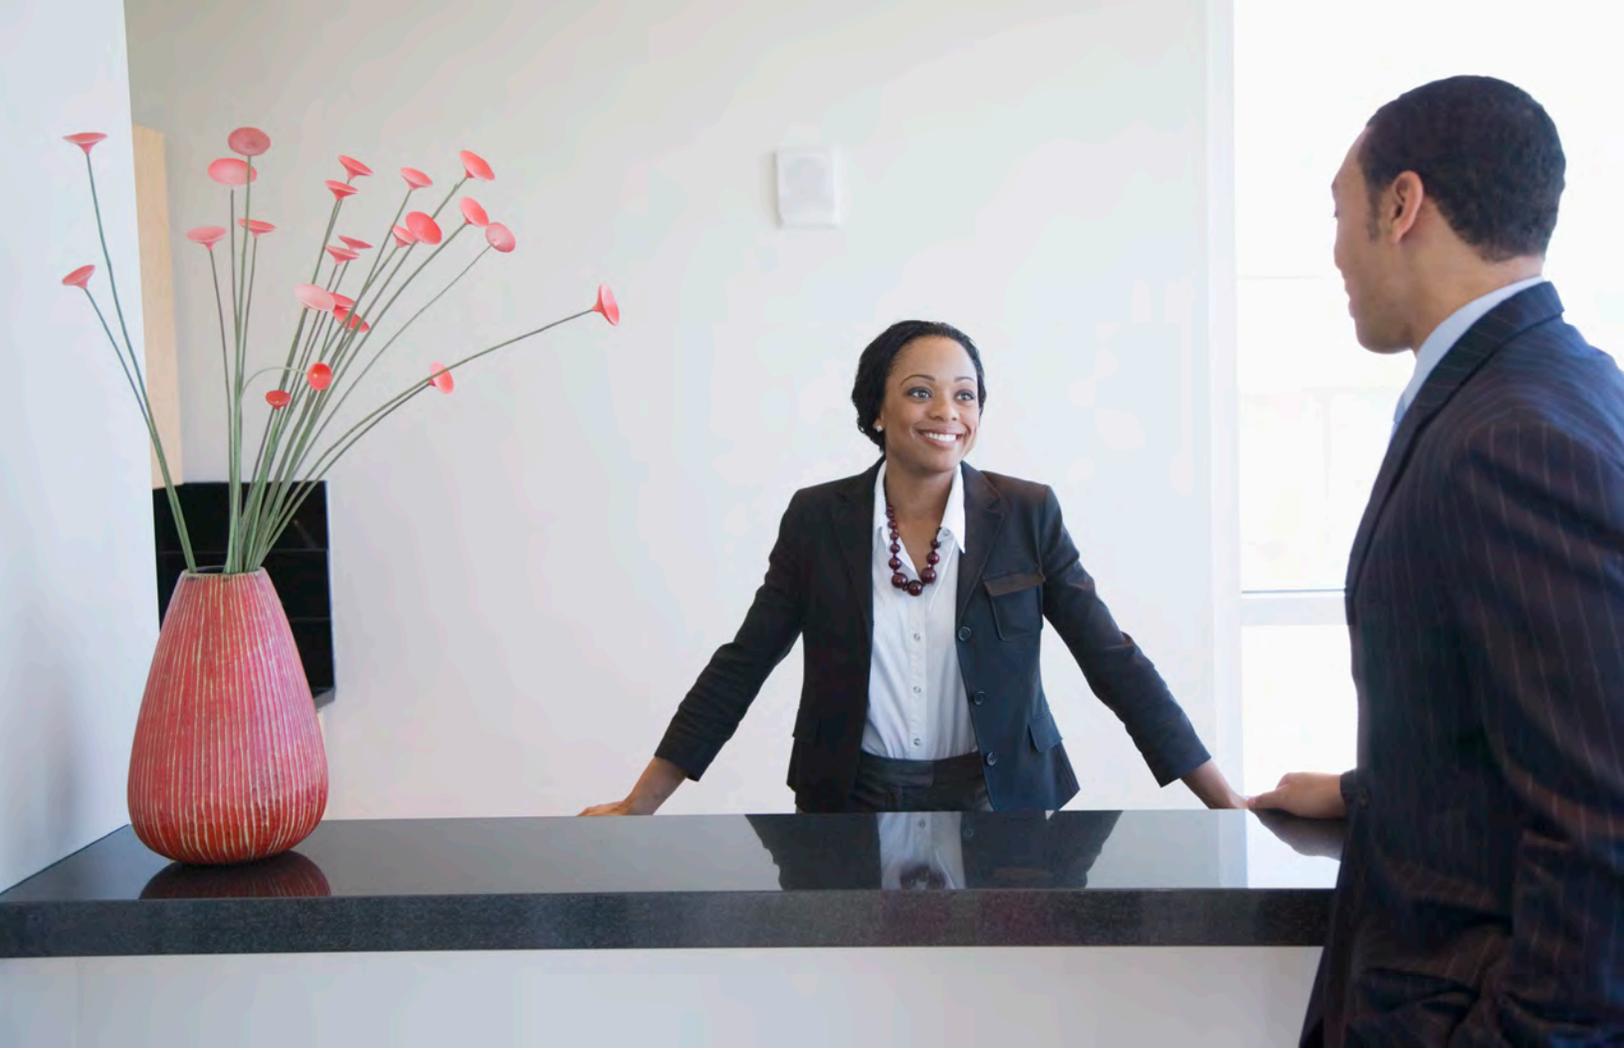

And by identifying problems and patterns early, you can resolve them before they become costly sources of frustration for your guests.

Get the Information You Need

Your ASX Report provides qualitative and quantitative assessments of:

- Overall energy savings.
- How system functionality is contributing to savings.
- Guest sleep quality.
- HVAC alarm conditions.
- Rooms with ongoing issues.
- Specific components by room with problems.
- Average hourly occupancy by month and day of week.
- Recommended actions to improve savings and guest comfort.

Find Out What Your Data Can Do

ASX Reports are just one example of how we can help you transform your data into savings.
