

# INNCOM by Honeywell Brings the Future of Guest Experience to HITEC 2015

*INNCOM Shows Money-Saving Global Solutions, Analytics Services and Innovation that Ensure Today's Technology Investment Supports Tomorrow's Requirements*

INNCOM® by Honeywell comes to HITEC with a complete suite of integrated solutions that showcase the future of optimized operations, reduced energy expenses and the capability to deliver truly memorable guest experiences.

INNCOM invites HITEC attendees to experience its integrated Deep Mesh Network wireless platform that provides reliable, total property multi-system communications and supports the BYOD trend as Millennials push hoteliers to pack more functionality into their apps. INNCOM will also spotlight data collection and Analytics Services that optimize property operations and profitability. INNCOM delivers the total experience: Guest comfort, elegant user controls, integrated room automation and energy savings.

INNCOM transforms data into actionable information. Its intelligent, networked solutions monitor and control guestroom touch points that include environmental switches, door locks and multiple third-party systems. INNCOM tracks and reports occupancy status, HVAC equipment run-time, guest security alerts and network availability to

ensure guests are safe, comfortable, and connected. INNCOM's INNcontrol™ 3 and its Deep Mesh Network make it possible to integrate many compatible systems so operators can remotely manage all property guestroom systems. INNCOM ASX Analytics Services Reports provide the metrics and analysis on all measurable data on room equipment and utilization to maximize operating efficiency and

profitability.

"INNCOM's system integration and data analysis are 21st Century essentials for operational efficiency and profitability. Attendees at HITEC can see how INNCOM simplifies property network communications and guestroom data analysis. INNCOM also powers the millennial travel trend toward mobile BYOD communications with software that lets hotel brands incorporate mobile room control into their own or third party provided apps for the ultimate guest experience," said John Tavares, INNCOM by Honeywell VP of business development. "INNCOM will also show how its Analytics services and expertise provide owners and operators with actionable information they can use to streamline operations and optimize maintenance costs."

INNCOM systems deliver efficiency to all property brands and hotel types INNCOM provides Integrated Room Automation Systems (IRAS) that enable hotel owners and operators to deliver memorable guest experiences and let property operations teams effortlessly manage rooms and energy. INNCOM solutions serve the needs of all property types from select service hotels to the epitome of luxury and lifestyle properties. This makes INNCOM the preferred provider for single-property owners or multi-property, multi-brand hotel companies with a wide variety of brand needs. INNCOM provides operators with a consistent, standardized platform management experience across all properties.

At HITEC booth 1411, INNCOM will also showcase its EVORA®, MODEVA® and ELEMENTS guest-facing devices. All devices can be customized to fit with your design objectives and control configuration. Based on designer specifications, they can control lighting and temperature, display privacy / make-up-room requests, and integrate

seamlessly with INNCOM energy management and other Integrated Room Automation Systems solutions. Made with touch-capacitance glass surfaces, the MODEVA Series provides designers with a vast array of options in color, fonts and control capabilities.

EVORA offers the same advanced technology found in the MODEVA Series but with a more traditional tactile guest interface that uses backlighting and custom engraving to designate specific switch functions.

ELEMENTS, is offered for the international market where the smaller size plates are often used. They included a variety of finishes and functions, including international outlet standards and USB connections.

INNCOM will also show an API that simplifies the addition of INNCOM's room controls to a franchisor's brand app to deliver a superior guest experience to the connected traveler. The API can be used to control lighting, temperature, guest annunciation and even the guestroom TV.

To maximize value for operators, the latest INNCOM solutions come with a simplified update path. The systems that properties install today are compatible with INNCOM technology implemented over the last 10 years, so operators can stay up to date with evolving system advances.

"Everything INNCOM does is to ensure people and resources are focused on delivering an optimal guest experience combined with operational efficiency, total staff productivity and energy savings," Tavares said.

"Delivering a memorable guest experience is our prime concern because this is where money is made – and saved. If INNCOM gives guests reasons to come back, it will have great value to the property."

#### **ABOUT INNCOM BY HONEYWELL**

*INNCOM® by Honeywell is an award-winning innovation company incorporated in 1986. Its solutions include advanced hardware and software for Energy Management, Integrated Room Automation and Systems Monitoring and Control for the global lodging markets.
